

Remedial Crack Stitching Bars

DESCRIPTION

Crack Stitching Bars are both wide and varied and they can be utilised in new buildings and for many specialised refurbishment requirements like apartment buildings, historic buildings, bridges and many more (building materials – concrete, brick, stone, wood, air concrete and others). Made from high-quality stainless steel, these bars are expertly installed into slots that have been cut into the masonry and then secured with grout, resulting in a quick and effective solution that will stand the test of time.

FEATURES

- Engineering solutions designed for your specific project requirements.
- Unlimited masonry reinforcement and anchorage applications
- Cracks restoration of any type
- Subsequent needling of double walled masonry
- Fixing into all types of masonry , stone materials and concrete

CORROSION CHARACTERISTICS

Stainless steel 316L (R4)
