POLYPROOF

Dampcourse - POLYPROOF

Product datasheet

View product online

Polyproof is a polyethelene dampcourse. It is a 500um thick, black polyethelene strip with an embossed surface that reduces slippage in use.

Polyproof is effective in providing moisture protection for use as a dampcourse material.

It can also be used as a concealed flashing under timber window frames and door frames. Not to be used for exposed applications.

Features

- Provides a protective barrier against rising damp
- Not to be used for exposed applications
