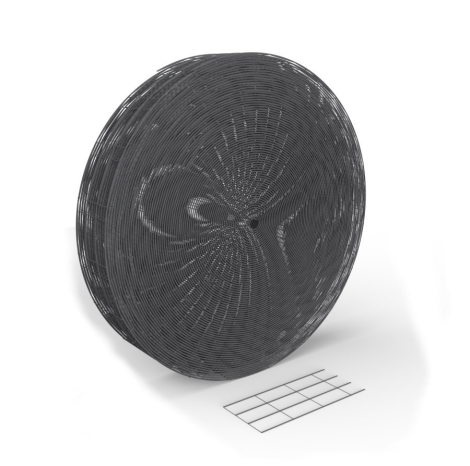
Brick Reo 70

Product datasheet

View product online



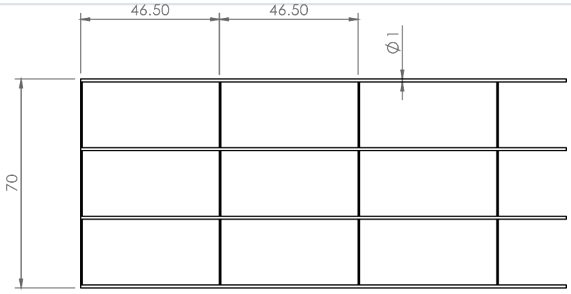
Brick Reo 70 is the standard in masonry reinforcement. Controlling crack formation in masonry is one of the many challenges of a construction project. Masonry has a high compressive strength, but the tensile strength is limited. Reinforce your masonry with Cerra Brick Reo 70 to add strength and prevent cracks.

Corrosion class	G
Material	Galvanised Wire

Features

- Clay brick / block work
- Universal applications
- Durable and efficient crack control
- Available in easy to handle stack-able rolls
- Increased longevity of walls
- Improved seismic resistance
- Creates greater bond strength
- User friendly and easy to install
- Reduces stress concentrations in walls

Technical details



Dimension drawing. Sizes are given as A.

Corrosion characteristics

G	Galvanised Wire
