AM V PLUS 400 – Injection Mortar

Product datasheet

View product online

AM V PLUS 400 – Injection Mortar is a high-strength, two-part anchoring system specifically suited for remedial works and structural repairs. Designed to provide secure anchorage in both solid and hollow masonry, as well as cracked and uncracked concrete, it’s ideal for reinstating wall ties, securing reinforcement bars, and stabilising masonry elements. The 400ml cartridge allows for precise, clean application, while the fast-curing formula ensures reliable performance, even in damp or aged substrates. Whether you're restoring structural integrity or retrofitting existing buildings, AM V PLUS 400 delivers long-lasting strength and stability.
