

Vertical Control Gap Tie

New slim design

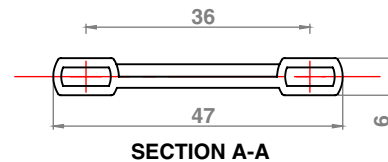

DESCRIPTION

New slim design Vertical control Gap Tie for brickwork. This tie will retain masonry integrity against lateral wind loads, sleeves will absorb differential movement.

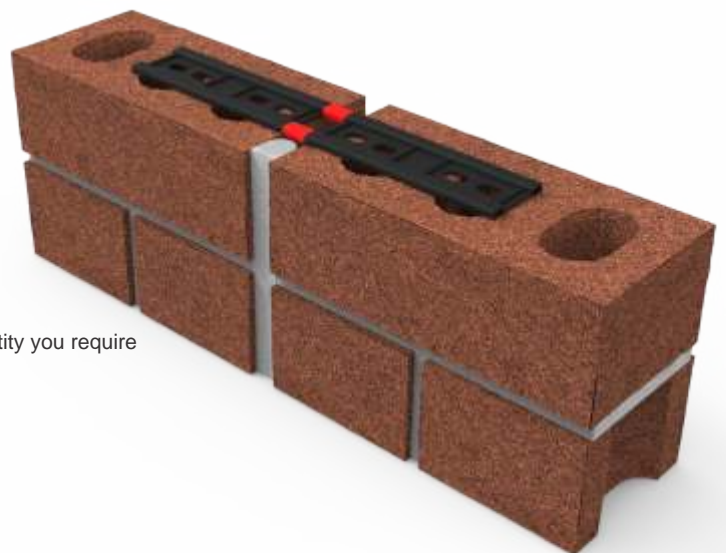

FEATURES

- Clay brick
- New slim design is easier to bed in due to its low profile of 6mm
- Tested to a control gap of 20mm
- Universal applications
- Australian design & tested AS/NZS 2699.2:2020

CORROSION CHARACTERISTICS

Hot dipped galvanising (R3)
 Stainless steel 316L wire (R4)
 Conforms to corrosion resistance set by AS/NZS 2699.2:2020 / AS 3700.
